

AFFORDABILITY COMBINED WITH RELIABILITY

ArTainium UV+ sublimation ink is best known for its reliability and affordability. These sublimation inks cost-effectively provide professional results for those who prefer to rely on their own colour management expertise and those who require less technical support.

ArTainium UV+ inks produce stunning graphics, quickly and easily, enabling your business to capitalise on the visual power of sublimation.

Flexible Ink Delivery Systems

ArTainium UV+ is available in standard cartridge or optional continuous ink system versions for most Epson printers, allowing you to attain the greatest value for your ink investment.

Extreme Colours

ArTainium UV+ delivers extremely vibrant colours and stunning resolution at levels that other digital processes simply cannot match. It's the top choice for professional photographers and digital imagers that demand precision and fine detail in every image.

Superior Durability

Sublimated images created with ArTainium UV+ are permanent! Hard substrate surfaces won't crack, peel or scratch. Apparel won't fade – ever – no matter how many times it is washed.

Infused Image

Unlike screen-printing, print-cut vinyl and direct-to-substrate printing which are applied to the surface of the product, ArTainium UV+ sublimation inks are actually infused into the surface itself.

Flexible Colour Management Solutions

ArTainium UV+ systems were developed with the true graphics professional in mind and designed to operate in both PC and Mac environments with a variety of Sawgrass's high quality ICC Colour Profiles.

EPSON® PRINTING SOLUTIONS FOR ARTAINIUM® UV+

With its advanced digital printing technology, Epson has proven itself to be a worldwide leader in image reproduction. Paired with ArTainium UV+ inks and high quality media, Epson printers deliver fantastic, high-resolution sublimation transfer prints day in and day out.

- Proprietary print technology generates precision high resolution prints
- High speed printing – up to 40 colour pages per hour
- High capacity paper trays hold up to 250 sheets of paper
